GNY QUALITY CONTROL PLAN

OBJECTIVE:

The objective of the quality control program is to insure that all products manufactured by GNY Equipment, LLC, will satisfy the following requirements:

1. Fulfill all customer specification.
2. Be complete as described by the Bill of Material.
3. All flow, functional, hydrostatic, Load test and any other required tests have been performed and documented.
4. That best commercial shop practices and GNY product standards are used during fabrication of these products.

RESPONSIBILITIES:

The quality control inspector shall:

1. Become familiar with the customer spec. shop drawings and Bill of Material.
2. Perform in-process inspection.
3. Perform first piece inspection of the first unit of a production run, machined parts and any other prefabricated items to be supplied to final assembly dept.
4. Perform inspection of welded assemblies.
5. Perform final inspection and testing prior to shipping.
